Hi,

We need to purchase more keyboard/mouse combos.

The receivers are plugged into the docks on each desk. We face a contact issue in the LDA where users move/remove keyboards, mice and receivers. In the past we could just pair up spares with each other, but can't do that any longer.

We can't use Bluetooth with hotdesking as the user would need to pair to new devices almost daily. If they didn't they'd be controlling someone else's laptop after moving desk!

We also need to purchase more headsets.

The current [redacted] seems to have dropped in price with other suppliers -

[redacted]
[redacted]
[redacted]
[redacted]
[redacted]

(all above are ex VAT)

However, with the office being busier and noisier, some users have asked for an over-ear headset rather than on-ear headset to help with passive noise isolation.

Can you recommend some models? With headsets, a Bluetooth version is OK, but we would need

Headsets are the more urgent of the above – we need to order today.
